I think Monday would be fine. For us, we can speak to our informal role working with WOGCC in the past. I just don't know how much we could say about the current situation since the formal AE request has not yet been submitted. In this sense, we are in a pre-decisional mode.

Subject: FW: Moneta Divide project

Hi Douglas,

Valois had the idea of asking WOGCC to discuss the Moneta Divide Project (and Marlin Well) at the UIC Director's meeting. If this sounds good to you, I'll contact Tom and Joe. So that we can give a unified EPA perspective if asked, I would like to schedule an internal meeting for Monday or Tuesday next week in advance of the Director's meeting. Given that the Dewey Burdock permits are due Tuesday, which day would make more sense for the meeting? When would the permits be released on Tuesday, morning or afternoon?
Thanks.

I am not in charge of anything, thank goodness. I think it would be appropriate for you to ask Tom since you are the WY PO.

We might start thinking of what we would like to say about the Dewey-Burdock plan to demonstrate no ISR contaminants will cross the AE boundary. I have talked about this topic twice in the past, so I think people will want to know how EPA wrapped this up. Since it is virtual, all interested DENR departments can listen in. We can think about that in earnest in a week or two.

Thanks!

Valois

Sounds like a good idea, even if I happen to get dragged into it.
Would you like me to ask Tom, or are you in charge of putting together some agenda items?

Hi Rick,
I was wondering about asking WY to give a presentation on the Moneta Divide project, then and now, during the UIC program manager's meeting. I didn't want to be the one to suggest it in case it meant you would be dragged in to give a presentation on EPA's take. So I thought I would mention it to you and you could suggest it to Tom if you think it's a good thing to do.

Valois
